Rationale of the Scheme

21. Glide Chem Private Limited is an associate company of the Nanz Med Science Pharma Private Limited and both companies are engaged in the similar kind of business with common shareholders and management. Thus, in order to eliminate multiple structures for ease of operation, effective control over the entities and reduced regulatory compliances under multiple Indian laws, it is proposed that the Glide Chem Private Limited be merged/ amalgamated with the Nanz Med Science Pharma Private Limited.
22. The objective/ benefits of the Scheme of Amalgamation is to simplify the group structure which will in turn help them to:
- Make optimum and efficient utilization of funds between the companies;
 - Simplify the corporate structure and reduce the number of companies;

- c) Better alignment, coordination and streamlining of day to day operations, leading to improvement in overall working culture and environment;
 - d) Reduce regulatory compliances under various laws thereof;
 - e) Pooling of manufacturing and operational facilities, physical and financial resources in a single consolidated entity for improved productivity, efficient treasury function and centralized management to supplement future growth opportunities; and
 - f) Enhance future business potential, and achieve greater efficiencies, productivity gains and advantages by pooling of resources of the Companies thereby significantly maximizing shareholders value.
23. The rationale and benefit of the proposed scheme have been duly provided in detailed and captured in the Scheme attached with this notice/explanatory statement.

Accounting Treatment

24. The Transferor Company is proposed to be wound up, hence the question of recording the effect of the Scheme in the books of accounts in accordance with the accounting standards prescribed under Section 133 of the Companies Act, 2013 does not arise.
25. With regard to the Transferee Company, the Scheme provides that::
- a. To the extent there are any inter-company balances and inter-company investments, loans, advances, debentures, deposits or other obligation, if any between Transferor Company and Transferee Company shall stand cancelled and corresponding effect shall be given in the books of accounts and the records of the Transferee Company for the reduction of any assets and liabilities as the case maybe.
 - b. Upon coming into effect of this Scheme and upon the arrangement becoming operative, the Transferee Company shall record the assets and liabilities comprised in the Undertakings transferred to and vested in it pursuant to this Scheme, at the same values as appearing in the books of accounts of the Transferor Company.
 - c. The Transferee Company shall credit the share capital accounts in its books of account with the face value of the new shares issued to the shareholders of the Transferor Company.
 - d. The balance of the retained earnings appearing in the financial statements of the Transferee Company would be aggregated with the corresponding balance appearing in the financial statements of the Transferor Company. Alternatively, it may be transferred to General Reserve, if any;
 - e. The excess or deficit, if any, remaining after recording the aforesaid entries shall be adjusted by the Transferee Company to the capital reserve account.

- b. In case of any difference in accounting policies between the Transferor Company and the Transferee Company, the accounting policies followed by the Transferee Company will prevail and the difference shall be quantified and adjusted in the books of the Transferee Company.
26. The aforesaid accounting treatment in relation to the Transferee Company is in conformity with the accounting standards prescribed under Section 133 of the Companies Act, 2013 and the same has been certified by the statutory auditors of the Transferee Company. Copy of the said certificate is annexed to the notice.

Other Declarations and compliances:

27. No investigation or proceedings under the Companies Act, 1956/ the Companies Act, 2013 have been instituted or are pending in relation to the Transferor or Transferee Company.
28. The Scheme does not envisage reduction of share capital of the Transferee Company and the proposed Scheme is not a corporate debt restructuring scheme.

As can be seen from the provisions of Section 230 (3) of the Companies Act 2013, where a meeting is proposed to be called in pursuance of an order of the Tribunal under sub-section (1), a notice of such meeting shall be sent to all the creditors or class of creditors and to all the members or class of members and

the debenture-holders of the company, individually at the address registered with the company which shall be accompanied by a statement disclosing the details of the compromise or arrangement, a copy of the valuation report, if any, and explaining their effect on creditors, key managerial personnel, promoters and non-promoter members, and the debenture -holders and the effect of the compromise or arrangement on any material interests of the directors of the company or the debenture trustees, and such other matters as may be prescribed. In terms of the proviso to above sub Section such notice and other documents shall also be placed on the website of the company, if any, and in case of a listed company, these documents shall be sent to the Securities and Exchange Board and stock exchange where the securities of the companies are listed, for placing on their website and shall also be published in newspapers in such manner as may be prescribed. It is further provided that where the notice for the meeting is also issued by way of an advertisement, it shall indicate the time within which copies of the compromise or arrangement shall be made available to the concerned persons free of charge from the registered office of the company.

Although Section 230(1) of the companies provides for dispensing with the meeting of the creditors subject to consent to the scheme by 90 % of the creditors and there is no provision for dispensing with the meetings of the shareholders, nevertheless, it is the case of the Applicant they are associate companies and their business is inextricable. It is stare decisis that where the amalgamating companies are group companies and the stakeholders viz. creditors and shareholders accord their consent to the scheme. The meetings may be dispensed with.

Mr. Deepak Gulati and Associates, Chartered Accountants have given certificate regarding shareholding qua both the Transferor and Transferee Company. Certificates regarding equity and preference shareholders of the Transferor company are placed on record as Annexure-I (page 169), Annexure-

K (page 175-176). Certificates regarding equity shareholders qua the Transferee company are placed on record as Annexure-U (page 290-291).

The affidavit of consent given by the equity and preferential shareholders qua the applicant companies are also available on record along with the certificates.

The report regarding valuation of equity shares and share exchange ratio is given of Mr. Saket Garg, Chartered Accountants (IBBI Registered Valuer No. IBBI/RV/11/2022/14794) which is placed on record as Annexure B (Page 55-71) to the petition. The relevant excerpt of the report read thus:

d. Cost of Equity

Thus, considering the factors detailed above—specifically the Risk-Free Rate, the common Market Rate of Return, and the company-specific Liquidity Premiums—I have computed the Cost of Equity for both Companies as per the table below:

Calculation of Cost of Equity		
Particulars	Glide Chem Private Limited (Transferor Company)	Nanz Med Science Pharma Private Limited (Transferee Company)
	Percentage (%)	Percentage (%)
Risk free Rate of Return	6.55%	6.55%
Market Rate of Return	12.65%	12.65%
Risk Premium	6.10%	6.10%
Beta	1.00	1.00
Liquidity Premium	15%	10%
Cost of Equity	27.65%	22.65%

e. Fair Value

Based on the Discounted Cash Flow (DCF) method under the Income Approach, the fair value of each equity share of the Companies has been determined as follows:

- Nanz Med Science Pharma Private Limited: Rs. 320.00 per share.
- Glide Chem Private Limited: Rs. 0.60 per share.

These values reflect the present value of the projected future free cash flows attributable to the equity shareholders of the respective Companies, discounted at the appropriate risk-adjusted rates derived under the Income Approach.

Detailed workings of the valuation, including all assumptions, projections, discount rate components, and terminal value computations for both Companies, are provided in Annexure-I and Annexure-II respectively.

13. Valuation of Equity Shares

The value per equity share has been determined at Rs. 320.00 per share for Nanz Med Science Pharma Private Limited and Rs. 0.60 per share for Glide Chem Private Limited based on the Discounted Free Cash Flow (DCF) method under the Income Approach.

As detailed in the earlier sections of this report, the DCF method was considered the most appropriate approach given the nature of the businesses, availability of reliable projections, and the long-term growth outlook of the Companies.

The other valuation approaches—namely the Market Approach and the Cost Approach (Net Asset Value Method)—were not considered in this valuation due to the absence of sufficiently comparable market data and the limited relevance of asset-based valuation techniques for going-concern, cash-flow-generating entities such as the subject Companies.

14. Conclusion

The valuation has been carried out using internationally accepted valuation methodologies and principles, ensuring that the determination of fair value is undertaken on an arm's length basis. Based on the analysis of the Companies' business, financial performance, future projections, and subject to the assumptions, caveats, and limitations detailed in this report, the fair value of the equity shares of the Companies, having a face value of Rs. 10/- each, has been determined as follows:

- Nanz Med Science Pharma Private Limited (Transferee Company): Rs. 320.00 per share.
- Glide Chem Private Limited (Transferor Company): Rs. 0.60 per share.

Recommendation of Share Exchange Ratio

Based on the relative fair values determined above, the Share Exchange Ratio is calculated as 0.0019. Accordingly, the recommended ratio for the proposed Amalgamation is:

"19 (Nineteen) Equity Shares of Nanz Med Science Pharma Private Limited of Rs. 10/- each fully paid up shall be issued and allotted for every 10,000 (Ten Thousand) Equity Shares of Glide Chem Private Limited of Rs. 10/- each fully paid up."

Additionally, the Transferor Company has 290,000 1% non-redeemable preference shares held by Mr. Lakhvinder Pal Singh Puri. Upon completion of the merger, new preference shares with identical terms and conditions shall be issued to him at a ratio of 1:1. Since the rights, privileges, and shareholding proportions remain unchanged, no separate valuation is required for this issuance.

This valuation is intended exclusively for the purpose of determining the Share Exchange Ratio in connection with the proposed Amalgamation of Glide Chem Private Limited into Nanz Med Science Pharma Private Limited. This conclusion is drawn solely for the purpose of the proposed Amalgamation in accordance with the Scheme of Amalgamation and complying with the relevant provisions of the Companies Act, 2013.

In view of the aforementioned, we dispose of the first motion application with the following directions: - i) the meetings of shareholders both equity and preferential qua the Transferor and Transferee Company are dispensed with.

ii) With due deference to the provisions of the Section 230 of the Companies Act, 2013 read with Companies (Compromises, Arrangements and Amalgamations) Rules, 2016, we appoint Hon'ble Justice Mr. Sunil Gaur (Mob. No. 9971000718) former Judge, Delhi High Court as Chairperson. Mrs. Rashmi Chopra Sr. Adv. (Mob. No. 9810311218 as alternate Chairperson and Ms. Nikhil Palli (Mob. No.- 9811676973) as Scrutinizer to conduct process as per Rules 5, 6 and 7 of above mentioned rules.

The Chairperson/Alternate Chairperson so appointed would hold meeting of unsecured and secured creditors qua both Transferor and Transferee Companies, by following due process mention in the Companies (Compromises, Arrangements and Amalgamations) Rules, 2016.

The meetings should be convened not later than 45 days from the date of uploading the present order. The fee of the Chairperson, Alternate Chairperson and Scrutinizer would be 1,50,000/-, 1,00,000/- and 50,000 respectively.

Let a notice qua the scheme be published in due deference to the provisions of Section 230(3) and (5) of Companies Act 2013 read with Rule 7 of Companies (Compromises, Arrangement and Amalgamation) Rules, 2016. The application stands **disposed off** accordingly.

It would be open to the Chairperson/Alternate Chairperson to hold the meeting virtually or physically as they decide.

2. Caveats, Limitations and Disclosures:

- a. I owe responsibility to only to the authority/client that has appointed me under the terms of the engagement letters. I will not be liable for any losses, claims, damages, or liabilities arising out of the actions taken, omissions or advice given by any other person. In no event shall we be liable for any loss, damages, cost or expenses arising in any way from fraudulent acts, misrepresentations or willful default on the part of the client or companies, their directors, employees, or agents.
- b. While my work has involved an analysis of financial information and accounting records, our engagement does not include an audit in accordance with generally accepted auditing standards of the clients existing business records. Accordingly, I express no audit opinion or any other form of assurance on this information.
- c. I do not provide assurance on the achievability of the results forecast by the management/owners as events and circumstances do not occur as expected; differences between actual and expected results may be material. I express no opinion as to how closely the actual results will correspond to those projected/forecast as the achievement of the forecast results is dependent on actions, plans and assumptions of management.
- d. The user to which this valuation is addressed should read the basis upon which the valuation has been done and be aware of the potential for later variations in value due to factors that are unforeseen at the valuation date. Due to possible changes in market forces and circumstances, this valuation report can only be regarded as relevant as at the valuation date.
- e. The valuation of companies and assets is made based on the available facts and circumstances and the conclusions arrived at in many cases will be subjective and dependent on the exercise of individual judgment. Although every scientific method has been employed in systematically arriving at the value, there is no indisputable single value and the estimate of the value is normally expressed as falling within a likely range.
- f. The actual market price achieved may be higher or lower than our estimate of value depending upon the circumstances of the transaction (for example the competitive bidding environment), the nature of the business (for example the purchaser's perception of potential synergies). The knowledge, negotiating ability and motivation of the buyers and sellers and the applicability of a discount or premium for control will also affect actual market price achieved. Accordingly, our valuation conclusion will not necessarily be the price at which any agreement proceeds. The final transaction price is something on which the parties themselves have to agree. We also emphasize that our opinion is not the only factor that should be considered by the parties in agreeing the transaction price.

- Recommend a Share Exchange Ratio for the issuance of new equity shares by the Transferee Company to the shareholders of the Transferor Company as consideration for the Amalgamation.
- Provide a basis for the Board of Directors to recommend the Scheme to the shareholders and creditors.
- Submit the valuation report to the National Company Law Tribunal (NCLT), Regional Director, and other regulatory authorities as part of the statutory approval process.

The valuation has been carried out on an **arm's length basis** in accordance with Internationally Accepted Valuation Methodologies and the **International Valuation Standards (IVS)**, ensuring that the interests of the shareholders of both companies are fairly represented.

8. Inspections and / or Investigation undertaken

Sources of Information:

The valuation has been carried out based on information obtained from the Ministry of Corporate Affairs website, relevant publicly available databases, and documents and explanations provided by the management. The key sources considered include:

- i. Discussions with the Company's senior management and financial advisors regarding future plans, ongoing projects, and expected financial performance.
 - ii. Audited financial statements of the Company as at 31st March 2025.
 - iii. Provisional financial statements for the period 01st April 2025 to 30th November 2025.
 - iv. Projected financial statements for the period 01st December 2025 to 31st March 2030.
 - v. Other publicly available information including details on the Company's business operations, industry data, market beta, and prevailing risk-free interest rates.
 - vi. Explanations, assumptions, and additional information provided by the management, on which reliance has been placed to the extent necessary for this valuation.
9. Procedure adopted in carrying out the Valuation.
- Receipt of the proposal from the Management for undertaking the valuation of equity shares and determination of the Share Exchange Ratio in connection with the proposed Amalgamation of Glide Chem Private Limited into Nanz Med Science Pharma Private Limited.
 - Discussion with the Management of the Companies and confirmation of acceptance of the valuation engagement.
 - Receipt of formal intimation regarding the appointment and confirmation of the scope of work.
 - Submission of a detailed checklist of required information, documents, financial statements, and records for both the Transferor and Transferee Companies.
 - Receipt of the information and documents as per the checklist, followed by an initial review and preliminary analysis of the business and financial position of both Companies.
 - Collection and examination of additional information and documents, where required.
 - Preparation and finalization of the **Valuation Report and Recommendation of Fair Share Exchange Ratio** for the proposed Amalgamation.

10. Valuation Standards Followed

Valuation Standards Followed International valuation methodologies and the relevant International Valuation Standards (IVS) issued by the International Valuation Standards Council (IVSC) have been followed for determining the fair value of the equity shares and the Share Exchange Ratio in connection with the proposed Amalgamation of Glide Chem Private Limited into Nanz Med Science Pharma Private Limited.

11. Premises of Value

The premise for determining the value is that the Companies are 'Going Concerns', and the enterprise values have been assessed on the assumption that they will continue their operations in the foreseeable future.

12. Approaches of Valuation

There are three approaches to carrying out the valuation of equity shares:

- Market Approach
- Cost Approach
- Income Approach

I. Market Approach

The market-based approach to business valuation seeks to determine the value of a company by comparing it with similar businesses that have been recently sold or with comparable publicly traded companies. This method is effective only when a sufficient number of relevant and reliable comparable transactions or market data points are available.

In the present case, for both Glide Chem Private Limited and Nanz Med Science Pharma Private Limited, no sufficiently comparable transactions or publicly available market data were identified that truly reflect the specific business models, scale, and operational nuances of the Companies. Accordingly, the Market Approach has not been considered for this valuation.

II. Cost Approach

The cost approach provides an indication of value based on the economic principle that a buyer will not pay more for an asset than the cost required to obtain another asset of equivalent utility, whether by purchase or by construction, unless factors such as time, inconvenience, or risk justify a higher price. This approach estimates value by determining the current replacement or reproduction cost of an asset and making appropriate deductions for physical deterioration and other forms of obsolescence.

Under this approach, the Net Asset Value (NAV) Method values the business based on the fair value of its assets and liabilities. Since this method does not consider the future stream of economic benefits, and given the context and nature of this valuation—where both entities are operating as going concerns—the Cost Approach (NAV Method) has not been considered appropriate for determining the value of the Companies.

III. Income Approach

Valuation under the Income Approach is based on the present value of the future free cash flows expected to be generated by the business. Depending on the nature of the valuation, this may be performed using either Free Cash Flow to the Firm (FCFF) or Free Cash Flow to Equity (FCFE).

The projected cash flows are analyzed using established financial and statistical techniques. The discount rates applied reflect the time value of money, the specific risks associated with the business, and broader market risk factors.

Discounts Cash Flow Method (DCF)

The Discounted Cash Flow (DCF) method estimates the intrinsic value of a company by discounting its expected future free cash flows to their present value. Under the FCFF approach, free cash flows available to all capital providers are discounted using the Weighted Average Cost of Capital (WACC). Under the FCFE approach, free cash flows available to equity shareholders are discounted using the Cost of Equity.

For the valuation of the equity shares of both Glide Chem Private Limited and Nanz Med Science Pharma Private Limited, the FCFE approach under the DCF method has been considered appropriate, taking into account the nature of the cash flows and the purpose of the valuation.

Methodology

The following steps have been undertaken for determining the fair value of the equity shares:

- Computation of Free Cash Flow to Equity (FCFE) for the discrete projection period of five years.
- Conducting reality checks and sanity checks on the projected financials.
- Review of market conditions, volatility, and the relevant beta factor.
- Computation of the appropriate discount rate, reflecting the risks specific to the Company.
- Determination of the Terminal Value based on accepted valuation principles.

Financial Workings

a. Cash Flows

For the purpose of valuing the equity shares, the provisional financial statements for the period 1st April 2025 to 30th November 2025, along with the projected financial statements for the period 01st December 2025 to 31st March 2030, have been considered.

b. Terminal Value

The Terminal Value represents the present value of the Company's expected cash flows beyond the explicit forecast period and reflects the assumption that the business will continue to operate as a going concern indefinitely. In establishing the Terminal Value, a perpetual growth model has been applied, which is a widely accepted practice under the Income Approach for businesses expected to have stable and sustainable operations in the long run. This model assumes that after the discrete forecast period, the Company's free cash flows will grow at a constant rate in perpetuity.

For the purpose of this valuation, the perpetual growth rate has been taken at 5%, which is considered conservative yet reasonable in light of the long-term prospects of the industry in which the Company operates. The selected growth rate also reflects expectations of steady economic expansion, technological evolution, and the Company's ability to maintain competitive positioning in the market over the long term. The resulting Terminal Value has then been discounted to its present value using the applicable discount rate, ensuring that both time value of money and the inherent risks associated with long-term projections are appropriately captured in the valuation.

c. Weighted Average Cost of Capital/Cost of Equity

The Weighted Average Cost of Capital (WACC) be applied as discount rate for discounting future expected cash flows from the business.

$WACC = \text{Weightage to Equity} \times \text{Cost of Equity} + \text{Weightage to Debt after Tax} (1 - \text{Tax Rate } \%) \times \text{Cost of Debt}$

$\text{Weighted Average Cost of Capital} = (K_e \times W_e) + (K_d \times W_d)$

$K_e = R_f + \text{Beta}(R_m - R_f)$

$K_e = \text{Cost of Equity}$

$R_f = \text{Risk Free Return}$ $R_m = \text{Market Return}$

$\text{Beta} = \text{Measure of Market risk}$

$K_d = \text{Cost of Debt}$

$W_e = \text{Weight of Equity}$

$W_d = \text{Weight of Debt}$

$R_m - R_f = \text{Equity Risk Premium}$

Since, there is no external debts expected to be raised in the future, the WACC is arrived based on the cost of equity only.

Risk Free Rate

The risk-free rate (Rf) has been considered at 6.55% for both Companies, which represents the yield-to-maturity (YTM) on long-term risk-free central government securities (10-Year G-Sec Par Yield) as on November 30, 2025.

Such securities are widely regarded as the most reliable benchmark for the risk-free rate in valuation exercises, given their negligible default risk and high market liquidity. The selected rate reflects current market conditions and long-term interest rate trends in India as of the valuation date.

The data has been sourced from the Financial Benchmarks India Pvt. Ltd. (FBIL) and the Reserve Bank of India (RBI) through publicly available information. Using the YTM of long-term government securities ensures that the discount rate appropriately captures the economic environment and aligns with established valuation standards, particularly under internationally accepted Income Approach methodologies.

Determination of Beta

In the absence of reliable and sufficiently comparable listed companies operating in the same line of business as Glide Chem Private Limited and Nanz Med Science Pharma Private Limited, or companies that exhibit a similar business model, operating risk profile, and investment risk characteristics, it was not feasible to derive an industry-specific or peer-based beta.

Given this limitation in the availability of relevant market data, a conservative beta of 1.00 has been adopted for the purpose of this valuation for both Companies.

The use of a beta of 1.00 reflects the assumption that the systematic risk of the Companies is broadly in line with the overall market risk. This approach is consistent with accepted valuation practice in situations where sector-specific or empirical beta information is either unavailable or unreliable. The assigned beta has been applied in the computation of the Cost of Equity, which forms an integral component of the discount rate used in valuing the equity shares of the Companies.

Market Rate of Return

Market Rate of Return To estimate the expected market return, the performance of a broad-based equity market index (S&P BSE SENSEX) over a sufficiently long period has been analyzed. A 10-year Compounded Annual Growth Rate (CAGR) of 12.65% has been adopted for both Companies.

This rate is derived from the index value increase from 26,145.67 on November 30, 2015, to 86,065.92 on November 30, 2025. This consistent rate reflects the long-term total return potential of the Indian equity market and provides a uniform basis for valuation.

Market Risk Premium $R_m - R_f$

The Market Risk Premium (MRP) represents the additional return expected by investors for assuming the systematic risk of investing in equities over risk-free government securities. Based

on the long-term equity market return of 12.65% and the risk-free rate of 6.55%, the implied Market Risk Premium works out to 6.10%. This spread is consistent with historical equity market performance and reflects the premium required by investors to compensate for long-term market volatility, economic cycles, and risk inherent in equity investments.

Liquidity Premium

A Liquidity Premium has been considered as part of the discount rate to reflect the additional risk associated with investing in equity shares of unlisted companies. Unlike publicly traded securities, which benefit from high trading volumes, transparent pricing, and immediate marketability, equity shares of the Companies are not readily tradable in the open market.

Investors in unlisted securities typically require a higher return to compensate for the inherent difficulty in exiting their investment, longer holding periods, and the absence of readily available market benchmarks.

Accordingly, the following Liquidity Premiums have been adopted:

- 10.00% for Nanz Med Science Pharma Private Limited.
- 15.00% for Glide Chem Private Limited.

These adjustments are consistent with industry practice for unlisted companies operating in specialized sectors and appropriately reflect the reduced marketability of the shares, aligning with internationally accepted valuation methodologies including the Income Approach under IVS.

Discount for Lack of Marketability (DLOM)

A Discount for Lack of Marketability (DLOM) has been applied to reflect the reduction in value arising from the inability to readily sell or transfer the equity shares of unlisted companies in the open market. Unlike the Liquidity Premium—which adjusts the discount rate to reflect the higher return expectation for investing in an illiquid security—DLOM is a valuation adjustment applied after determining the intrinsic value to capture the practical difficulty an investor faces in converting the investment into cash within a reasonable time frame.

DLOM specifically considers factors such as the absence of an active trading market, restrictions on the transferability of shares, limited potential buyers, longer holding periods, and additional exit-related risks.

Based on accepted valuation literature, empirical studies, and the specific characteristics of each Company, the following DLOM percentages have been deemed reasonable and conservative for the present valuation exercise:

- 10.00% for Nanz Med Science Pharma Private Limited.
- 20.00% for Glide Chem Private Limited

These adjustments ensure that the final equity value appropriately reflects the liquidity constraints faced by shareholders of the respective Companies.

d. **Cost of Equity**

Thus, considering the factors detailed above—specifically the Risk-Free Rate, the common Market Rate of Return, and the company-specific Liquidity Premiums—I have computed the Cost of Equity for both Companies as per the table below:

Calculation of Cost of Equity		
Particulars	Glide Chem Private Limited (Transferor Company)	Nanz Med Science Pharma Private Limited (Transferee Company)
	Percentage (%)	Percentage (%)
Risk free Rate of Return	6.55%	6.55%
Market Rate of Return	12.65%	12.65%
Risk Premium	6.10%	6.10%
Beta	1.00	1.00
Liquidity Premium	15%	10%
Cost of Equity	27.65%	22.65%

e. **Fair Value**

Based on the Discounted Cash Flow (DCF) method under the Income Approach, the fair value of each equity share of the Companies has been determined as follows:

- Nanz Med Science Pharma Private Limited: Rs. 320.00 per share.
- Glide Chem Private Limited: Rs. 0.60 per share.

These values reflect the present value of the projected future free cash flows attributable to the equity shareholders of the respective Companies, discounted at the appropriate risk-adjusted rates derived under the Income Approach.

Detailed workings of the valuation, including all assumptions, projections, discount rate components, and terminal value computations for both Companies, are provided in Annexure-I and Annexure-II respectively.

13. Valuation of Equity Shares

The value per equity share has been determined at Rs. 320.00 per share for Nanz Med Science Pharma Private Limited and Rs. 0.60 per share for Glide Chem Private Limited based on the Discounted Free Cash Flow (DCF) method under the Income Approach.

As detailed in the earlier sections of this report, the DCF method was considered the most appropriate approach given the nature of the businesses, availability of reliable projections, and the long-term growth outlook of the Companies.

The other valuation approaches—namely the Market Approach and the Cost Approach (Net Asset Value Method)—were not considered in this valuation due to the absence of sufficiently comparable market data and the limited relevance of asset-based valuation techniques for going-concern, cash-flow-generating entities such as the subject Companies.

14 Conclusion

The valuation has been carried out using internationally accepted valuation methodologies and principles, ensuring that the determination of fair value is undertaken on an arm's length basis.

Based on the analysis of the Companies' business, financial performance, future projections, and subject to the assumptions, caveats, and limitations detailed in this report, the fair value of the equity shares of the Companies, having a face value of Rs. 10/- each, has been determined as follows:

- Nanz Med Science Pharma Private Limited (Transferee Company): Rs. 320.00 per share.
- Glide Chem Private Limited (Transferor Company): Rs. 0.60 per share.

Recommendation of Share Exchange Ratio

Based on the relative fair values determined above, the Share Exchange Ratio is calculated as 0.0019. Accordingly, the recommended ratio for the proposed Amalgamation is:

"19 (Nineteen) Equity Shares of Nanz Med Science Pharma Private Limited of Rs. 10/- each fully paid up shall be issued and allotted for every 10,000 (Ten Thousand) Equity Shares of Glide Chem Private Limited of Rs. 10/- each fully paid up."

Additionally, the Transferor Company has 290,000 1% non redeemable preference shares held by Mr. Lakhvinder Pal Singh Puri. Upon completion of the merger, new preference shares with identical terms and conditions shall be issued to him at a ratio of 1:1. Since the rights, privileges, and shareholding proportions remain unchanged, no separate valuation is required for this issuance.

This valuation is intended exclusively for the purpose of determining the Share Exchange Ratio in connection with the proposed Amalgamation of Glide Chem Private Limited into Nanz Med Science Pharma Private Limited. This conclusion is drawn solely for the purpose of the proposed Amalgamation in accordance with the Scheme of Amalgamation and complying with the relevant provisions of the Companies Act, 2013.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF GLIDE CHEM PRIVATE LIMITED

Report on the Audit of the Financial Statements

OPINION

We have audited the financial statements **GLIDE CHEM PRIVATE LIMITED**, which comprises the balance sheet as at 31st March, 2025, and the statement of Profit and Loss and cash flow statements, for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2025 and its financial performance, for the year ended on that date.

BASIS FOR OPINION

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the Financial Statements.

EMPHASIS OF MATTER

We draw attention following points to the matter specified in the Notes to the financial statements:

1. Non receiving of payment from foreign customer :-

The company has made export sale of Rs. 61,18,365/- during the FY 2020-22. However, during the financial year 2024-25, the company's books of accounts showed a trade receivables balance of Rs. 61,18,365/- for Alfatima Medical Equipment Trading Enterprises (Foreign debtors) as of March 31, 2025. However, throughout the fiscal year 2024-25, the company has not received any payment from Alfatima Medical Equipment Trading Enterprises. Additionally, no approval or intimation has been submitted to the Authorized Dealer (AD Bank) regarding the non-receipt of the amount from Alfatima Medical Equipment Trading Enterprises as per the provisions of FEMA. As a result, the company's assets have been overstated by Rs. 61,18,365/-.

2. Fraud Committed with company

Mr. Gaganpreet Singh, Previous Director/KMP and Promoter was absconding since June 2022 after conducting fraud with company as explained by the management. The police complaint against Mr. Gaganpreet Singh has been filed dated 18th Aug 2022 complaint number 107 in the local police station Rajouri Garden and the same has been forwarded to office of commissioner of police dated 20th Aug 2022. The company has already initiated the application u/s 156(3) of CRPC and filed FIR against Mr. GaganPreet Singh in response to said complaint. The ongoing proceedings before the Hon'ble Metropolitan Magistrate in the court of Chief Metropolitan Magistrate Tis Hazari are in progress.

3. Written off of Amount recoverable from Balveen Kaur and her family member:

In FY 2024-25, the company has written off the outstanding balance of Rs. 3,68,88,777/- recoverable from Balveen Kaur and her family member on account of payment of their home loan vide settlement deed dated 15-04-2025, which was already filed with the NCLT.

4. MSME

Disallowance u/s 43B(h) of MSME Act,2006: In the course of our audit, for the purpose of verifying disallowances under section 43B(h) of the Income-tax Act, 1961 as per clause 22, we have conducted verification on a test check basis. We have relied on the MSME classification provided by the auditee and the representations made by the management. We have not independently verified

for **GLIDE CHEM PVT. LTD.**

A. P. Das

Director

the accuracy of the MSME classification. Consequently, our verification of the compliance with section 43B(h) is based on the information and representations provided by the auditee's management, and our opinion is formed based on the selected samples reviewed. Our opinion is thus dependent on the correctness of these classifications, representations, and the sample's adequacy.

Provision of Interest on late payment to MSME: The Company has not provided the details of delayed payment to MSME creditors and has also not booked interest on late payments to MSME vendors for FY 2024-25, as required under Section 16 of the MSME Development Act, 2006. Section 16 of the Act mandates that, in case of delayed payment to MSME vendors, the company is required to provide interest to the vendors as compensation. This provision is currently absent from the company's financial statements for the relevant period.

5. Matter pending in NCLT

A petition under Section 241 of the Companies Act, 2013, was filed by Mrs. Balveen Kaur before the Hon'ble NCLT alleging oppression and mismanagement against the Company. Subsequently, a settlement was reached between the management and Mrs. Balveen Kaur, and the said petition has been withdrawn pursuant to the order of the Hon'ble NCLT dated 06-06-2025.

6. AS-15 not complied by the company

The Company has not complied with Accounting Standard (AS) 15, as the provision for gratuity is made at the discretion of management, rather than being determined based on an actuarial valuation report, as required by the standard.

7. Advance received for sale of property:

The Company has entered into an agreement to sell its property situated at T-66, Rajouri Garden, New Delhi. The Company has received an advance amount of Rs. 30.00 lakhs against the proposed sale. However, the sale deed is yet to be executed in favour of the buyer.

Our opinion is not modified in this respect.

Material Uncertainty related to Going Concern

The Company's net worth has eroded due to cash loss and increase in cost of operations. However, having regard to financial support from its promoters the financial statements have been prepared on the basis that the Company is a going concern.

Our opinion is not modified in this respect.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **GLIDE CHEM PRIVATE LIMITED** ("the Company") as of 31st March 2025 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included

For **GLIDE CHEM PVT. LTD.**

Director

obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

For **GLIDE CHEM PVT. LTD.**

A.P. Singh

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Notes forming part of the Financial Statements

1 COMPANY INFORMATION

Glide Chem Private Limited Company . It was incorporated at National Capital Territory of Delhi on May 28, 1998 to carry on business of Manufacturing of Chemicals.

2 SIGNIFICANT ACCOUNTING POLICIES

a Basis of Preparation

These financial statements have been prepared in accordance with the Generally Accepted Accounting Principles in India ('Indian GAAP') to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, as applicable. The financial statements have been prepared under the historical cost convention on accrual basis, except for certain financial instruments which are measured at fair value.

b Use of Estimates

The preparation of financial statements requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expense during the year. Examples of such estimates include provisions for doubtful receivables, provision for income taxes, the useful lives of depreciable Property, Plant and Equipment and provision for impairment. Future results could differ due to changes in these estimates and the difference between the actual result and the estimates are recognised in the period in which the results are known / materialise.

c Property, Plant and Equipment

Property, Plant and Equipment are stated at cost, less accumulated depreciation / amortisation. Costs include all expenses incurred to bring the asset to its present location and condition.

Property, Plant and Equipment exclude computers and other assets individually costing Rs. 5000 or less which are not capitalised except when they are part of a larger capital investment programme.

d Depreciation and amortization

Depreciation has been provided on the Fixed Asset on the WDV method and in accordance with the useful life of the Asset as prescribed under Schedule II of the Companies Act, 2013.

The useful life of the Assets has been taken as below;

Type of Assets	Useful Life
Buildings	30 Years
Plant and Equipment	15 Years
Furniture and Fixtures	10 Years
Vehicles	8 Years
Office equipment	5 Years
Computers	3 Years
Software	5 Years

e Impairment of assets

At each balance sheet date, the management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset. Reversal of impairment loss is recognised as income in the statement of profit and loss.

Notes forming part of the Financial Statements

f Investment

Long-term investments and current maturities of long-term investments are stated at cost, less provision for other than temporary diminution in value. Current investments, except for current maturities of long-term investments, comprising investments in mutual funds, government securities and bonds are stated at the lower of cost and fair value.

g Inventories

Raw materials are carried at the lower of cost and net realisable value. Cost is determined on a weighted average basis. Purchased goods-in-transit are carried at cost. Work-in-progress is carried at the lower of cost and net realisable value. Stores and spare parts are carried at lower of cost and net realisable value. Finished goods produced or purchased by the Company are carried at lower of cost and net realisable value. Cost includes direct material and labour cost and a proportion of manufacturing overheads.

The valuation for inventories is as follows;

Classification	Valuation Policy
Finished Goods	At lower of cost or net realizable value.
Raw Material	At lower of cost or net realizable value.
WIP	At Cost
Consumables	At Cost

h Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amount of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

i Revenue recognition

Revenue from the sale are recognised upon delivery, which is when title passes to the customer. Revenue is reported net of discounts.

Dividend is recorded when the right to receive payment is established. Interest income is recognized on time proportion basis taking into account the amount outstanding and the rate applicable.

j Employee Benefits

Post-employment benefit plans

Contributions to defined contribution retirement benefit schemes are recognised as expense when employees have rendered services entitling them to such benefits.

For defined benefit schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in full in the statement of profit and loss for the period in which they occur. Post service cost is recognised immediately to the extent that the benefits are already vested, or amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

Other employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service. These benefits include compensated absences such as paid annual leave, overseas social security contributions and performance incentives.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the balance sheet date.

Notes forming part of the Financial Statements

k Foreign currency transactions

Income and expense in foreign currencies are converted at exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities other than net investments in non-integral foreign operations are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses are recognised in the statement of profit and loss. Exchange difference arising on a monetary item that, in substance, forms part of an enterprise's net investments in a non-integral foreign operation are accumulated in a foreign currency translation reserve.

i Taxation

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with it will fructify.

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis. The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

m Earnings Per Shares

Basic earning per share is computed by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Diluted earning per share is computed by taking into account the weighted average number of equity shares outstanding during the period and the weighted average number of equity shares which would be issued on conversion of all dilutive potential equity shares into equity shares.

n Provisions, Contingent liabilities and Contingent assets

A provision is recognised when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

Notes forming part of the Financial Statements

1 COMPANY INFORMATION

Glide Chem Private Limited Company . It was incorporated at National Capital Territory of Delhi on May 28, 1998 to carry on business of Manufacturing of Chemicals.

2 SIGNIFICANT ACCOUNTING POLICIES

a Basis of Preparation

These financial statements have been prepared in accordance with the Generally Accepted Accounting Principles in India ("Indian GAAP") to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, as applicable. The financial statements have been prepared under the historical cost convention on accrual basis, except for certain financial instruments which are measured at fair value.

b Use of Estimates

The preparation of financial statements requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expense during the year. Examples of such estimates include provisions for doubtful receivables, provision for income taxes, the useful lives of depreciable Property, Plant and Equipment and provision for impairment. Future results could differ due to changes in these estimates and the difference between the actual result and the estimates are recognised in the period in which the results are known / materialise.

c Property, Plant and Equipment

Property, Plant and Equipment are stated at cost, less accumulated depreciation / amortisation. Costs include all expenses incurred to bring the asset to its present location and condition. Property, Plant and Equipment exclude computers and other assets individually costing Rs. 5000 or less which are not capitalised except when they are part of a larger capital investment programme.

d Depreciation and amortization

Depreciation has been provided on the Fixed Asset on the WDV method and in accordance with the useful life of the Asset as prescribed under Schedule II of the Companies Act, 2013. The useful life of the Assets has been taken as below:

Type of Assets	Useful Life
Buildings	30 Years
Plant and Equipment	15 Years
Furniture and Fixtures	10 Years
Vehicles	8 Years
Office equipment	5 Years
Computers	3 Years
Software	5 Years

e Impairment of assets

At each balance sheet date, the management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset. Reversal of impairment loss is recognised as income in the statement of profit and loss.

For GLIDE CHEM PVT. LTD.

A.P. Singh

Director

f Investment

Long-term investments and current maturities of long-term investments are stated at cost, less provision for other than temporary diminution in value. Current investments, except for current maturities of long-term investments, comprising investments in mutual funds, government securities and bonds are stated at the lower of cost and fair value.

g Inventories

Raw materials are carried at the lower of cost and net realisable value. Cost is determined on a weighted average basis. Purchased goods-in-transit are carried at cost. Work-in-progress is carried at the lower of cost and net realisable value. Stores and spare parts are carried at lower of cost and net realisable value. Finished goods produced or purchased by the Company are carried at lower of cost and net realisable value. Cost includes direct material and labour cost and a proportion of manufacturing overheads.

The valuation for inventories is as follows;

Classification	Valuation Policy
Finished Goods	At lower of cost or net realizable value.
Raw Material	At lower of cost or net realizable value.
WIP	At Cost
Consumables	At Cost

h Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amount of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

i Revenue recognition

Revenue from the sale are recognised upon delivery, which is when title passes to the customer. Revenue is reported net of discounts.

Dividend is recorded when the right to receive payment is established. Interest income is recognised on time proportion basis taking into account the amount outstanding and the rate applicable.

j Employee Benefits

Post-employment benefit plans

Contributions to defined contribution retirement benefit schemes are recognised as expense when employees have rendered services entitling them to such benefits.

For defined benefit schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in full in the statement of profit and loss for the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested, or amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

Other employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service. These benefits include compensated absences such as paid annual leave, overseas social security contributions and performance incentives.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the balance sheet date.

k Foreign currency transactions

for GLIDE CHEM PVT. LTD.

A.P. Singh

Director

Income and expense in foreign currencies are converted at exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities other than net investments in non-integral foreign operations are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses are recognised in the statement of profit and loss. Exchange difference arising on a monetary item that, in substance, forms part of an enterprise's net investments in a non-integral foreign operation are accumulated in a foreign currency translation reserve.

l Taxation

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income taxpayable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with it will fructify.

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

m Earnings Per Shares

Basic earning per share is computed by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Diluted earning per share is computed by taking into account the weighted average number of equity shares outstanding during the period and the weighted average number of equity shares which would be issued on conversion of all dilutive potential equity shares into equity shares.

n Provisions, Contingent liabilities and Contingent assets

A provision is recognised when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Annexure - B to the Independent Auditor's Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **NANZ MED SCIENCE PHARMA PRIVATE LIMITED PRIVATE LIMITED** ("the Company") as of 31st March 2025 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting,

For Nanz Med Science Pharma Pvt. Ltd.

Director

assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes forming part of the Financial Statements

1 COMPANY INFORMATION

Nanz Med Science Pharma Private Limited Company . It was incorporated at National Capital Territory of Delhi on Dec 19, 2006 to carry on business of Manufacturing of Pharmaceuticals Products

2 SIGNIFICANT ACCOUNTING POLICIES

a Basis of Preparation

These financial statements have been prepared in accordance with the Generally Accepted Accounting Principles in India ('Indian GAAP') to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, as applicable. The financial statements have been prepared under the historical cost convention on accrual basis, except for certain financial instruments which are measured at fair value.

b Use of Estimates

The preparation of financial statements requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expense during the year. Examples of such estimates include provisions for doubtful receivables, provision for income taxes, the useful lives of depreciable fixed assets and provision for impairment. Future results could differ due to changes in these estimates and the difference between the actual result and the estimates are recognised in the period in which the results are known / materialise.

c Leases

In accordance with AS-19 " Accounting for leases " ,lease arrangements ,where the risks and rewards incidental to ownership of an asset substantially vests with the lessor, are recognised as operating leases. Lease payments under operating lease are recognised as an expense in profit and loss account.

d Property, Plant and Equipment

Property, Plant and Equipment are stated at cost, less accumulated depreciation / amortisation. Costs include all expenses incurred to bring the asset to its present location and condition. Property, Plant and Equipment exclude computers and other assets individually costing Rs. 5000 or less which are not capitalised except when they are part of a larger capital investment programme.

e Depreciation and amortization

In respect of fixed assets (other than freehold land and capital work-in-progress) acquired during the year, depreciation/amortisation is charged on a written down value basis so as to write-off the cost of the assets over the useful lives.

Type of Assets	Useful Life
Buildings	30 Years
Plant and Equipment	15 Years
Furniture and Fixtures	10 Years
Vehicles	8 Years
Office equipment	5 Years
Computers	3 Years
Softwares	5 Years

Notes forming part of the Financial Statements

f Impairment of assets

At each balance sheet date, the management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset. Reversal of impairment loss is recognised as income in the statement of profit and loss.

g Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year. Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating leases. Lease rentals under operating leases are recognised in the statement of profit and loss on a straight-line basis.

h Investment

Long-term investments and current maturities of long-term investments are stated at cost, less provision for other than temporary diminution in value. Current investments, except for current maturities of long-term investments, comprising investments in mutual funds, government securities and bonds are stated at the lower of cost and fair value.

i Inventories

Raw materials are carried at the lower of cost and net realisable value. Cost is determined on a weighted average basis. Purchased goods-in-transit are carried at cost. Work-in-progress is carried at the lower of cost and net realisable value. Stores and spare parts are carried at lower of cost and net realisable value. Finished goods produced or purchased by the Company are carried at lower of cost and net realisable value. Cost includes direct material and labour cost and a proportion of manufacturing overheads.

The valuation for inventories is as follows;

Classification	Valuation Policy
Finished Goods	At lower of cost or net realizable value.
Raw Material	At lower of cost or net realizable value.
WIP	At Cost
Consumables	At Cost

j Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amount of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

k Earning Per share

The basic earnings per share is computed by dividing the net profit attributable to the equity shareholders for the year by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed using the weighted average number of equity shares and also weighted average number of equity shares that could have been issued on the conversion of all diluted potential equity shares. The diluted potential equity shares are adjusted for the proceed receivables, had the shares being actually issued at fair value. Diluted potential shares are deemed converted as of the beginning of year unless they have been issued a later date.

Notes forming part of the Financial Statements

l Revenue recognition

Revenue from the sale of goods are recognised upon delivery, which is when title passes to the customer. Revenue is reported net of discounts.

Dividend is recorded when the right to receive payment is established. Interest income is recognised on time proportion basis taking into account the amount outstanding and the rate applicable.

m Employee Benefits

Post-employment benefit plans

Contributions to defined contribution retirement benefit schemes are recognised as expense when employees have rendered services entitling them to such benefits.

For defined benefit schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in full in the statement of profit and loss for the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested, or amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

Other employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service. These benefits include compensated absences such as paid annual leave, overseas social security contributions and performance incentives.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the balance sheet date.

n Foreign currency transactions

Income and expense in foreign currencies are converted at exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities other than net investments in non-integral foreign operations are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses are recognised in the statement of profit and loss. Exchange difference arising on a monetary item that, in substance, forms part of an enterprise's net investments in a non-integral foreign operation are accumulated in a foreign currency translation reserve.

o Taxation

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with it will fructify.

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

p Provisions, Contingent liabilities and Contingent assets

A provision is recognised when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

q Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

These financial statements have been prepared in accordance with the Generally Accepted Accounting Principles in India ('Indian GAAP') to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, as applicable. The financial statements have been prepared under the historical cost convention on accrual basis, except for certain financial instruments which are measured at fair value. Notes forming part of the Financial Statements

1 COMPANY INFORMATION

Nanz Med Science Pharma Private Limited Company . It was incorporated at National Capital Territory of Delhi on Dec 19, 2006 to carry on business of Manufacturing of Pharmaceuticals Products

2 SIGNIFICANT ACCOUNTING POLICIES

a Basis of Preparation

These financial statements have been prepared in accordance with the Generally Accepted Accounting Principles in India ('Indian GAAP') to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, as applicable. The financial statements have been prepared under the historical cost convention on accrual basis, except for certain financial instruments which are measured at fair value.

b Use of Estimates

The preparation of financial statements requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosures relating to the contingent liabilities as at the date of the financial statements and reported amounts of income and expense during the year. Examples of such estimates include provisions for doubtful receivables, provision for income taxes, the useful lives of depreciable fixed assets and provision for impairment. Future results could differ due to changes in these estimates and the difference between the actual result and the estimates are recognised in the period in which the results are known / materialise.

c Leases

In accordance with AS-19 " Accounting for leases " ,lease arrangements ,where the risks and rewards incidental to ownership of an asset substantially vests with the lessor, are recognised as operating leases. Lease payments under operating lease are recognised as an expense in profit and loss account.

d Property, Plant and Equipment

Property, Plant and Equipment are stated at cost, less accumulated depreciation / amortisation. Costs include all expenses incurred to bring the asset to its present location and condition.

Property, Plant and Equipment exclude computers and other assets individually costing Rs. 5000 or less which are not capitalised except when they are part of a larger capital investment programme.

e Depreciation and amortization

In respect of fixed assets (other than freehold land and capital work-in-progress) acquired during the year, depreciation/amortisation is provided on the straight-line method so as to allocate the cost of the assets over their estimated useful lives.

Type of Assets	Useful Life
Buildings	30 Years
Plant and Equipment	15 Years
Furniture and Fixtures	10 Years
Vehicles	8 Years
Office equipment	5 Years
Computers	3 Years
Softwares	5 Years

Director

f Impairment of assets

At each balance sheet date, the management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset. Reversal of impairment loss is recognised as income in the statement of profit and loss.

g Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating leases. Lease rentals under operating leases are recognised in the statement of profit and loss on a straight-line basis.

h Investment

Long-term investments and current maturities of long-term investments are stated at cost, less provision for other than temporary diminution in value. Current investments, except for current maturities of long-term investments, comprising investments in mutual funds, government securities and bonds are stated at the lower of cost and fair value.

i Inventories

Raw materials are carried at the lower of cost and net realisable value. Cost is determined on a weighted average basis. Purchased goods-in-transit are carried at cost. Work-in-progress is carried at the lower of cost and net realisable value. Stores and spare parts are carried at lower of cost and net realisable value. Finished goods produced or purchased by the Company are carried at lower of cost and net realisable value. Cost includes direct material and labour cost and a proportion of manufacturing overheads.

The valuation for inventories is as follows;

Classification	Valuation Policy
Finished Goods	At lower of cost or net realizable value.
Raw Material	At lower of cost or net realizable value.
WIP	At Cost
Consumables	At Cost

j Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amount of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

k Earning Per share

The basic earnings per share is computed by dividing the net profit attributable to the equity shareholders for the year by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed using the weighted average number of equity shares and also weighted average number of equity shares that could have been issued on the conversion of all diluted potential equity shares. The diluted potential equity shares are adjusted for the proceed receivables, had the shares being actually issued at fair value. Diluted potential shares are deemed converted as of the begininh of year unless they have been issued a later date.

l Change in Accounting Estimates

For Nanz Med Science Pharma Pvt. Ltd.

M. M. S.
Director

During the year, the Company has changed the method of depreciation of items of Property Plant and Equipment from the Written Down Value Method (WDV) to the Straight-Line Method (SLM), as the management believes that the revised method more appropriately reflects the pattern of consumption of the economic benefits of the assets.

The change has been accounted for prospectively as a change in accounting estimate in accordance with Accounting Standard (AS) 5. Consequently, depreciation for the year is lower by ₹ 3,41,07,050 and the profit before tax for the year is higher by ₹ 3,41,07,050.

m Revenue recognition

Revenue from the sale of goods are recognised upon delivery, which is when title passes to the customer. Revenue is reported net of discounts.

Dividend is recorded when the right to receive payment is established. Interest income is recognised on time proportion basis taking into account the amount outstanding and the rate applicable.

n Employee Benefits

Post-employment benefit plans

Contributions to defined contribution retirement benefit schemes are recognised as expense when employees have rendered services entitling them to such benefits.

For defined benefit schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are recognised in full in the statement of profit and loss for the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested, or amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

Other employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service. These benefits include compensated absences such as paid annual leave, overseas social security contributions and performance incentives.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the balance sheet date.

o Foreign currency transactions

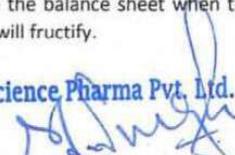

Income and expense in foreign currencies are converted at exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities other than net investments in non-integral foreign operations are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses are recognised in the statement of profit and loss. Exchange difference arising on a monetary item that, in substance, forms part of an enterprise's net investments in a non-integral foreign operation are accumulated in a foreign currency translation reserve.

p Taxation

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions. Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is recognised as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with it will fructify.

For Nanz Med Science Pharma Pvt. Ltd.

Director

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

q Provisions, Contingent liabilities and Contingent assets

A provision is recognised when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

r Leases

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognised for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

These financial statements have been prepared in accordance with the Generally Accepted Accounting Principles in India ('Indian GAAP') to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, as applicable. The financial statements have been prepared under the historical cost convention on accrual basis, except for certain financial instruments which are measured at fair value. Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating leases. Lease rentals under operating leases are recognised in the statement of profit and loss on a straight-line basis.

s End use of fund

The Company has used funds borrowed for the specific purposes only for the purposes which it has been borrowed.
